

“JUST BAYS”

MEHUTCHISON & CO.

The entire advertisement is framed by a decorative border consisting of small, stylized potted bay trees. There are ten trees along each of the four sides of the border, for a total of 40 trees. Each tree has a dark, rounded canopy with small white dots and sits in a simple rectangular pot.

## "JUST BAYS"

Rather a peculiar title, but these Bays are JUST what you need and JUST what you should have. This booklet is published to suggest JUST what style of Bay is most suitable for YOUR purpose.

BAY TREES are being used more and more each season for formal gardening, Roof Garden and Summer decorative effects, also for Florists' signboards. What more useful or effective sign for a well kept florist establishment than a pair of compact Pyramid or Standard Bays to mark the entrance. They are imported in tubs exclusively from Belgium.

This booklet shows you at a glance the different shapes and sizes commercially grown and offered in our Special price lists for Spring or Fall direct importations from Belgium.
